foundation of ecological function, affecting soil conservation, wildlife habitat, plant communities, invasive species, and water quality. Establishing locally-adapted, self-sustaining plant communities can also support transportation goals for safety and efficiency. Past obstacles to establishing native plant communities on roadsides have been technical, informational, and organizational. Effective strategies and practical techniques for revegetating the disturbed conditions with limited resources must be made available to practitioners. Multiple disciplines, ranging from engineering to soil science, ecology, botany, and wildlife science, must be able to work cooperatively, not in isolation. This report offers an integrated approach to facilitate the successful establishment of native plants along roadsides and other areas of disturbance associated with road

modifications. It guides readers through a comprehensive process of: 1) initiating, 2) planning, 3) implementing, and 4) monitoring a roadside revegetating project with native plants.

After the Act Mavis Maclean 2019-04-18 After the Act describes the aftermath of the recent removal under LASPO of public funding from legal services in family matters other than in defined cases such as child protection and domestic abuse. Through analysis of the policy context, interviews with key players, observation of services provided by lawyers, students, lay support workers and the advice sector, the authors outline the work being done and the skills being used in a range of settings. The book raises questions not only about access to family justice, but about the role of law in family matters in an increasingly post-legal society. ongoing casework - raises questions about where costs fall and how quality can be assured. Many of these services are forms of private ordering, where outcomes are hard to assess. If neither the state nor the individual can afford full legal services where the best interests of any child involved are of paramount importance, and lawyers negotiate to make best use of the resources available, perhaps it is time to consider using lawyers differently, with lay support, to solve problems before they become disputes.
