Troubled Pasts in Europe Rok Zupančič 2023-09-29 Based on the findings of a major research project, this book investigates how European societies confront their troubled pasts today. In particular, the text explores what kinds of measures can be taken and which strategies endorsed to facilitate the process of overcoming difficult historic legacies in seven European states: Kosovo, Bosnia and Herzegovina, Germany, Ireland, Spain, Cyprus and Poland. The book is written by an international team of experts and examines strategies and actions in both policy making and civil society of European countries, as well as throughout the EU as a collective.

Hidden Keys to Software Break-Ins and Unauthorized Dmitry Sklyarov 2003 Primarily for software developers but also useful for those who want to grasp the integral ideas and problems of modern data protection technologies, this book deals with the basic problems concerning software and data security. Stressed are the most common mistakes made by developers and the main principles to be reckoned with when developing security tools. Also provided is information on cryptography and cryptanalysis and a review of the means and methods commonly used for software security, as well as a demonstration of the weak points of these methods. In addition, the problems associated with implementing digital rights management (DRM) systems are covered along with the current methods and technologies used to look for weak areas in a program.

Partnership for Change East Asian Bureau of Economic Research 2016-08-15 The Australia–China Joint Economic Report is the first major independent joint study of the bilateral relationship and has the blessing of both national governments. The Report is an academic policy study by leading researchers in both Australia and China. It draws policy conclusions to guide the development of bilateral economic relations that include an Australia–China Comprehensive Strategic Partnership for Change, an Australia–China Commission, and an Australia–China Basic Treaty of Cooperation. **EU Induced Institutional Change in Post-Soviet Space** Ryhor Nizhnikau 2018-07-24 This book analyses the role of the European Union in the process of institutional change in its Eastern neighbourhood and explains why EU policies arrive at contradictory outcomes at the sectoral level. Combining EU studies approaches with insights from the fields of new institutionalism, international development studies and transnationalisation, it explains how the EU policies contribute to rule persistence or lead to institutional change. Highlighting the importance of investigating how the policies of external intervention interact with domestic institutions, the book also provides a coherent presentation of the political and economic problems of Ukraine and Moldova and a comparative analysis in key areas at critical junctures of their development. This book will be of key interest to scholars and students of European Union politics and more broadly to International Relations, post-Soviet and Russian studies.

China Tourism: Cross-cultural Studies Honggen Xiao 2016-02-12 Deriving from a special issue on "China Watching" (Journal of China Tourism Research), this book presents the readers with a collection of seven independent research reports that adopt cross-cultural communication and cultural studies approaches to China tourism. Topics covered include the authenticity in cultural diffusion, the articulation of China through tourism, cross-cultural comparison of vacation consumption interpretation, the Chinese gaze of Europe, influence of globalization and localization on the development of tourism, behavioral implications of Chinese outbound tourism, and citing behaviors of Chinese tourism researchers from foreign language sources. The book will be of great interest to academic researchers, graduate students, policy makers, and destination managers who are interested in China tourism. The varied aspects covered, together with the engaging writing style, makes the text a pleasure to read. This book was published as a special issue of the Journal of China Tourism Research.

Disabled International Students in British Higher Education Armineh Soorenia 2013-12-30 A wealth of evidence demonstrates that disabled domestic students experience disabling barriers in such areas as funding, pedagogy and social life in Higher Education (HE). Research also indicates that non-disabled international students experience a wide range of cultural and linguistic difficulties throughout their university experience whilst studying in England. Nevertheless, there is a dearth of research concerning the specific experiences of disabled international students in English universities. With the increasing internationalisation of HE in the past two decades this is highly significant. Analysing disabled international students' accounts in British universities appears to be all the more pertinent due to the current austerity measures, which have impacted on the financial situation of Higher Education Institutions. Armineh Soorenia comments on the relevance of inclusive educational theories and policies within an increasingly internationalised HE system, with reference to disabled international students' experiences in England. The project is both timely and appropriate as there is an acute shortage of documentation on the application of policies for the inclusion of disabled students and disabled international students specifically in English universities. The findings identify key barriers in the four broad categories of (1) Information, Access and Funding; (2) Disability Services; (3) Learning and Teaching; and (4) Non-Disability Support Services such as accommodation and social life. The study provides an up-to-date snapshot of disabled international students' accounts and the multiple disadvantages they experience in their universities based on their identities as 'disabled', 'international' and sometimes 'mature' students. The author also draws on a number of insights which could contribute towards a more inclusive HE system. The implication of concentrating on disabled international students' experiences have direct ramifications, not only for this specific group, but also a wide range of students from diverse minority backgrounds who could gain from inclusive practices in education.

A Guide to the Immigration Act 2016 Alison Harvey 2017-03-25 A Guide to The Immigration Act 2016 is produced in association with ILPA and provides a clear and straightforward explanation to the provisions of this legislation, with relevant commentary following each section of the Act. Those litigating will be able to identify all relevant sources and materials rapidly. Practitioners from other areas of law affected by the provisions in the context of housing, social welfare and employment law will be able rapidly to navigate these complex provisions and to understand them. The UK Government stated that its purpose in bringing forward this legislation was to tackle illegal immigration by making it harder to live and work in the United Kingdom without permission. The Immigration Act 2016 not only makes changes to immigration law and practice but also extends immigration control into other areas such as housing, social welfare and employment to create the 'hostile environment' envisaged. The approach is to summarise each provision of the Act and to set it within both its political and legal context, providing full legal references as well identifying relevant guidance, supporting materials and statements from parliamentary debates. The aim of the publication is to provide practitioners and academic and political commentators with a comprehensive guide to the Act, the bulk of the work being comments on the legal provisions interleaved with each section of the Act.

Visa Stories Bahriye Kemal 2013-07-29 Visa Stories: Experiences between Law and Migration is an interdisciplinary volume that addresses recent public controversies on migration in the UK and Europe. In this context, it aims to recover the voice of migrants by proposing a new, non-conventional form of literary writing: the visa narrative genre. This is a versatile and dialogic form which moves beyond strictly academic modes of migration talk and aims to re-introduce a human, experiential dimension in the representation of people on the move. Indeed, the visa narratives collected in this volume provide a unique example of testimonies and memories of migrants from different geographical locations and social positions, from the student to the refugee. In its political and poetic aspects, this collective volume is a useful tool for understanding the complexity of migration today and the way in which national and international regulations are applied in different regions of the world. Whereas our era is commonly portrayed as one of increased globalisation and freedom of movement, visa narratives offer a closer insight into the experience of people trying to cross borders, and reveal a substantially different reality of immobility, distrust and misunderstanding.

Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Interdisciplinary Approaches to the Future of Africa and Policy Development Tshabangu, Icarbord 2022-03-11 Despite several idealistic efforts towards a united Africa, the term remains a hypothetical concept symbolizing a desired federal state on the continent. While globalization and interconnectedness have brought prosperity in some parts of the world, Africa has not generally benefited from global decisions. These decisions, policies, and practices have tended

to be wholly influenced by the rich and powerful countries and their transnational agencies and corporations in pursuit of their national interests. Faced with such enormous external economic and political forces, the divided and powerless African states have been unable to bargain for lucrative economic deals or pursue national interests for the benefit of their people, hence the need to examine what exists in varied fields and the emerging trends for the future. Interdisciplinary Approaches to the Future of Africa and Policy Development addresses critical issues and challenges in Africa and seeks to examine and understand the future trends in Africa through a deconstructive interrogation of present trends. Covering a wide range of topics such as sustainability, equality, and democracy, it is ideal for researchers, academicians, students, economists, policymakers, political parties, trade unions, and NGOs.

Nationalism, Law and Statelessness John R. Campbell 2013-07-18 In 1998 a bloody war erupted in The Horn of Africa between Ethiopia and Eritrea. During the war Ethiopia arrested and expelled 70,000 of its citizens, and stripped another 50,000-plus of their citizenship on the basis of their presumed ethnicity. Nationalism, Law and Statelessness: Grand Illusions in the Horn of Africa examines the events which led up to the war, documents the expulsions and denationalisations that took place and follows the flight of these stateless Ethiopians out of the Horn into Europe. The core issue examined is the link between sovereignty and statelessness as this plays out in The Horn of Africa and in the West. The book provides a valuable insight into how nations create and perpetuate statelessness, the failure of law, both national and international, to protect and address the plight of stateless persons, and the illusory nature of nationalism, citizenship and human rights in the modern age. The study is one of a very few which examines the problem of statelessness through the accounts of stateless persons themselves. This book will be of great interest to students and researchers in anthropology, law, politics, African studies and refugee studies as well as professionals and all those interested in stateless persons in the West, including Eritreans, who continue to be denied basic rights.

Hacking Point of Sale Slava Gomzin 2014-02-03 Must-have guide for professionals responsible for securing credit and debit card transactions As recent breaches like Target and Neiman Marcus show, payment card information is involved in more security breaches than any other data type. In too many places, sensitive card data is simply not protected adequately. Hacking Point of Sale is an compelling book that tackles this enormous problem head-on. Exploring all aspects of the problem in detail - from how attacks are structured to the structure of magnetic strips point-to-point encryption, and more - it's packed with practical recommendations. This terrific resource goes beyond standard PCI compliance guides to offer real solutions on how to achieve better security at the point of sale. A unique book on credit and debit card security, with an emphasis on point-to-point encryption of payment transactions (P2PE) from standards to design to application. Explores all groups of security standards applicable to payment applications, including PCI, FIPS, ANSI, EMV, and ISO Explains how protected areas are hacked and how hackers spot vulnerabilities Proposes defensive maneuvers, such as introducing cryptography to payment applications and better securing application code Hacking Point of Sale: Payment Application Secrets, Threats, and Solutions is essential reading for security providers, software architects, consultants, and other professionals charged with addressing this serious problem. **Computational Social Science** Wei Luo 2021-02-18 Selected papers from the International Conference on New Computational Social Science, focusing on the following five aspects: Big data acquisition and analysis. Integration of qualitative research and quantitative research, Sociological Internet experiment research, Application of ABM simulation method in Sociology Research, Research and development of new social computing tools. With the rapid development of information technology, especially sweeping progress in the Internet of things, cloud computing, social networks, social media and big data, social computing, as a data-intensive science, is an emerging field that leverages the capacity to collect and analyze data with an unprecedented breadth, depth and scale. It represents a new computing paradigm and an interdisciplinary field of research and application. A broad comprehension of major topics involved in social computing is important for both scholars and practitioners. This proceedings presents and discusses key concepts and analyzes the state-of-the-art of the field. The conference not only gave insights on social computing, but also affords conduit for future research in the field. Social computing has two distinct trends: One is on the social science issues, such as computational social science, computational sociology, social network analysis, etc; The other is on the use of computational techniques. Finally some new challenges ahead are summarized, including interdisciplinary cooperation and training, big data sharing for scientific data mashups, and privacy protect.

Legalized Families in the Era of Bordered Globalization Daphna Hacker 2017-08-18 Providing a panoramic and interdisciplinary perspective, this book explores the interrelations between globalization, borders, families and the law. It considers the role of international, multi-national and religious laws in shaping the lives of the millions of families that are affected by the opportunities and challenges created by globalization, and the ongoing resilience of national borders and cultural boundaries. Examining familial life-span stages - establishing spousal relations, raising children and being cared for in old age - Hacker demonstrates the fruitfulness in studying families beyond the borders of national family law, and highlights the relevance of immigration and citizenship law, public and private international law and other branches of law. This book provides a rich empirical description of families in our era. It is relevant not only to legal scholars and practitioners but also to scholars and students within the sociology of the family, globalization studies, border studies, immigration studies and gender studies.

British Librarianship and information work 2011-2015 J. H. Bowman 2017-01-24 This is the latest in an important series of reviews going back to 1928. The book contains 28 chapters, written by experts in their field, and reviews developments in the principal aspects of British librarianship and information work in the years 2011-2015.

Design for the Changing Educational Landscape Andrew Harrison 2013-10-15 The whole landscape of space use is undergoing a radical transformation. In the workplace a period of unprecedented change has created a mix of responses with one overriding outcome observable worldwide: the rise of distributed space. In the learning environment the social, political, economic and technological changes responsible for this shift have been further compounded by constantly developing theories of learning and teaching, and a wide acceptance of the importance of learning as the core of the community, resulting in the blending of all aspects of learning into one seamless experience. This book attempts to look at all the forces driving the provision and pedagogic performance of the many spaces, real and virtual, that now accommodate the experience of learning and provide pointers towards the creation and design of learning-centred communities. Part 1 looks at the entire learning universe as it now stands, tracks the way in which its constituent parts came to occupy their role, assesses how they have responded to a complex of drivers and gauges their success in dealing with renewed pressures to perform. It shows that what is required is innovation within the spaces and integration between them. Part 2 finds many examples of innovation in evidence across the world - in schools, the higher and further education campus and in business and cultural spaces - but an almost total absence of integration. Part 3 offers a model that redefines the learning landscape in terms of learning outcomes, mapping spatial requirements and activities into a detailed mechanism that will achieve the best outcome at the most appropriate scale. By encouraging stakeholders to creating an events-based rather than space-based identity, the book hopes to point the way to a fully-integrated learning landscape: a learning community.

Security and Migration in the 21st Century Elspeth Guild 2013-04-25 The 21st century has brought new and challenging dimensions to our understanding of security and migration. The old Cold War framework of security as related to war and peace, international relations and foreign affairs has given way to a multiplicity of competing notions, including internal security, human security and even social security. At the same time, migration has become a hotly contested issue, characterised by an enormous difference of views and objectives. So what do we mean by security and migration in the contemporary world? How do these two important fields intersect? And what does this collision of policy concerns and public interests mean for states and individuals alike? In this cutting-edge book, Elspeth Guild seeks to answer these pressing questions, drawing on a wide range of recent examples from the impact of asylum seekers on state border security to identity security in citizenship rules to illustrate her arguments. By approaching the topic from the perspective of the individual - citizen of one state, migrant in another - the book examines key aspects of the security-migration nexus, such as the relationship with refugees; torture; extraordinary rendition; privacy and the retention of personal data; and human rights' protection. The first volume in Polity's new 'Dimensions of Security' series, this book is a must-read for all students of international politics, development studies and related fields.

Cameron and the Conservatives T. Heppell 2012-02-07 Specialists in Conservative Party politics examine the effectiveness of the Cameron led coalition. The contributors examine Cameron as leader and Prime Minister; the Conservatives' modernisation strategy; the level of ideological coherence in 'liberal conservatism'; and the impact of the coalition on a range of policy areas and on 'New' Labour. **Due Process as a Limit to Discretion in International Commercial Arbitration** Franco Ferrari 2020-09-25 The absence of a coherent body of case law on due process has increasingly motivated recalcitrant parties to use due process as a strategic tool, thereby putting at risk the prospect of obtaining an enforceable award in expeditious proceedings. Countering this inherent danger, here for the first time is a comprehensive study on due process as a limit to arbitral

discretion, showing how due process applies in practice in key jurisdictions around the world. Based on country reports prepared by leading arbitration practitioners and academics, the book explores how courts in major arbitration jurisdictions apply due process guarantees when performing their post-award review. The contributors, driven by an interest in exploring the interplay between due process and efficiency, focus on those due process guarantees that set limits to arbitral discretion. Matters covered include the following: the right to be heard and how it may be affected by submission deadlines, evidentiary offers by the opposing party, and directions to the parties as to which aspects require further pleading; the right to be treated equally and its interplay with the duty to give each party full opportunity to present its case and to comment on submissions and evidence filed by the other party; the duty to effect proper notice, including delivery and language issues; the independence and impartiality of arbitrators with a focus on when an arbitrator's conduct can become the basis for a successful challenge; and courts' standards of deference when examining issues arising at the post-award stage. An introductory general report thoroughly analyses the normative basis of due process and its interplay with party autonomy, as well as applicable standards of review and commonalities among manifestations of due process across jurisdictions. A signal contribution to the debate regarding the so-called due process paranoia affecting arbitral tribunals – a topic relevant in every single arbitration proceeding – this book provides practical guidelines on how to maintain the balance between due process and efficiency and how to apply due process and counteract its misuse in arbitration proceedings. It will be welcomed by counsel, arbitrators, and judges from all countries, as well as by academics and researchers concerned with international commercial arbitration.

Information Theft Prevention Romanus Okeke 2016-02-05 As retail businesses migrate to the digital realm, internal information theft incidents continue to threaten on-line and off-line retail operations. The evolving propagation of internal information theft has surpassed the traditional techniques of crime prevention practices. Many business organizations search for internal information theft prevention guides that fit into their retail business operation, only to be inundated with generic and theoretical models. This book examines applicable methods for retail businesses to effectively prevent internal information theft. Information Theft Prevention offers readers a comprehensive understanding of the current status of the retail sector information theft prevention models in relation to the internationally recognized benchmark of information security. It presents simple and effective management processes for ensuring better information system security, fostering a proactive approach to internal information theft prevention. Furthermore, it builds on well-defined retail business cases to identify applicable solutions for businesses today. Integrating the retail business operations and information system security practices, the book identifies ways to coordinate efforts across a business in order to achieve the best results. IT security managers and professionals, financial frauds consultants, cyber security professionals and crime prevention professionals will find this book a valuable resource for identifying and creating tools to prevent internal information theft.

The London Dream Chris McMillan 2020-08-28 The London Dream tells the story of a city that promises opportunity, excitement and the possibility of prosperity. It is a mythology has launched millions of migrant journeys. No one benefits more from the flow of willed and willing workers than London's employers. And still, they come. They come to a city propelled by a newly cool capitalism and hungry for workers to serve it. From actors to cleaners, academics to café workers, The London Dream explores the stories of Londoners chasing the dreams offered by the city and the economy within which their precarious hopes become profits.

Law and Migration in a Changing World Marie-Claire Foblets 2022-04-05 This volume comprises national reports on migration and migration law from 17 countries representing all continents. The vast majority of these are countries of immigration, which means they face specific challenges in terms of managing migratory flows that are increasingly linked with climate change and scarce natural resources worldwide, and they need to find viable ways to integrate humanitarian migration. Unlike so many recent publications in the field of international migration law, this book brings together reports on diverse countries that are rarely regarded as part of one and the same picture, depicting globalized migration in the contemporary era that to a large extent challenges state sovereignty. The contributions delineate the legal regimes that individual states are continually developing and modifying with a view to managing and controlling access of individual persons to their respective territories. They also show how the restrictive measures that states resort to in the event of failure to manage migration could have a lasting legal impact. The General Report preceding the country reports provides a comparative overview of the national reports, and is divided into two parts. The first, more technical in nature, addresses the classic questions relating to admission to and residence in a country. The second, more reflective section, examines the relationship between laws and migration in a wider and multidisciplinary perspective. To allow a robust comparison, the country reports all follow a similarly wide-ranging structure; to the extent possible, they also cover the historical, sociological and demographic factors that help explain legal regimes and migratory flows in each country. Each country report includes analyses of recent legislative developments and delicate questions that are still awaiting adequate (legal) responses as well as perspectives for the future.

Flexible Bodies Anusha Kedhar 2020 Drawing on exclusive interviews, choreographic analysis, and the author's own dance experience, *Flexible Bodies* reveals how South Asian dancers in Britain use their craft and creativity to navigate often precarious economic, national, and racial terrain.

Unlocking Africa's Business Potential Landry Signé 2020-04-07 Africa welcomes business investment and offers some of the world's highest returns and impacts Africa has tremendous economic potential and offers rewarding opportunities for global businesses looking for new markets and long-term investments with favorable returns. Africa has been one of the world's fastest-growing regions over the past decade, and by 2030 will be home to nearly 1.7 billion people and an estimated \$6.7 trillion worth of consumer and business spending. Increased political stability in recent years and improving regional integration are making market access easier, and business expansion will generate jobs for women and youth, who represent the vast majority of the population. Current economic growth and poverty-alleviation efforts mean that more than 43 percent of the continent's people will reach middle- or upper-class status by 2030. *Unlocking Africa's Business Potential* examines business opportunities in the eight sectors with the highest potential returns on private investment—the same sectors that will foster economic growth and diversification, job creation, and improved general welfare. These sectors include: consumer markets, agriculture and agriprocessing, information and communication technology, manufacturing, oil and gas, tourism, banking, and infrastructure and construction. The book's analysis of these sectors is based on case studies that identify specific opportunities for investment and growth, along with long-term market projections to inform decision-making. The book identifies potential risks to business and offers mitigation strategies. It also provides policymakers with solutions to attract new business investments, including how to remove barriers to business and accelerate development of the private sector.

India-EU People Mobility Rupa Chanda 2015-12-10 This book provides an overview of the trends and characteristics of mobility between India and the EU from an historical (diaspora), economic (trade and investment) and regulatory (immigration) perspective. It also analyses the movement of professionals in selected sectors and occupations, such as

IT, architecture, engineering and legal services, as well as student mobility between the two regions. The book discusses sector-specific as well as cross-cutting factors that shape the different types of mobility between the EU and India, the regulatory and other constraints to these migration flows, their impact and contribution on both sides, and the associated sensitivities and concerns. Drawing upon the analysis of these different types of mobility and the associated challenges, the book highlights how such mobility could be facilitated and managed through bilateral discussions between India and the EU, under formal as well as other arrangements.

Administrative Justice in Wales and Comparative Perspectives Sarah Nason 2017-09-15 This book offers a unique understanding of what administrative justice means in Wales and for Wales, whilst also providing an expert and timely analysis of comparative developments in law and administration. It includes critical analysis of distinctly Welsh administrative laws and redress measures, whilst examining contemporary administrative justice issues across a range of common and civil law, European and international jurisdictions. Key issues include the roles of commissioners, administrative courts, tribunals and ombudsmen in devolved and federal nations, and evolving relationships between citizens and the state – especially in the context of localisation and austerity – and will be of interest to legal and public administration professionals at home and internationally.

Privatisation of Migration Control Austin Sarat 2021-09-27 This special issue is the second of a two-part edited collection on the privatisation of migration. The central thrust of the special issue is a critical analysis of modern day manifestations of private participation in immigration control.

Mobile Payments, Consumer Policy and the Law Nwanneka V. Ezechukwu 2023-03-17 Mobile technology offers an innovative and cost-effective channel for delivering a range of financial services, including mobile payments. In some jurisdictions, mobile payments simply provide a convenient option for facilitating payment transactions. In other jurisdictions, mobile payments are viewed as potentially transformative because they present an opportunity to expand access to financial services. However, as with other innovations, mobile payments raise consumer protection concerns and require robust regulatory mechanisms to address such concerns. Against this backdrop, the book adopts a typology of consumer policy tools which can be used to address the identified consumer concerns. This typology guides the enquiry into the existing consumer protection frameworks applying to mobile payments in selected jurisdictions (Canada, Kenya, and the United Kingdom). The main objective of this endeavour is to identify best practices that national authorities seeking to leverage mobile payments and similar innovations can emulate. This book will be of interest to policymakers, regulators, industry stakeholders, students, and scholars interested in the regulation of innovative financial services, particularly from a consumer protection perspective.

Secure Smart Embedded Devices, Platforms and Applications Konstantinos Markantonakis 2013-09-14 New generations of IT users are increasingly abstracted from the underlying devices and platforms that provide and safeguard their services. As a result they may have little awareness that they are critically dependent on the embedded security devices that are becoming pervasive in daily modern life. *Secure Smart Embedded Devices, Platforms and Applications* provides a broad overview of the many security and practical issues of embedded devices, tokens, and their operation systems, platforms and main applications. It also addresses a diverse range of industry/government initiatives and considerations, while focusing strongly on technical and practical security issues. The benefits and pitfalls of developing and deploying applications that rely on embedded systems and their security functionality are presented. A sufficient level of technical detail to support embedded systems is provided throughout the text, although the book is quite readable for those seeking awareness through an initial overview of the topics. This edited volume benefits from the contributions of industry and academic experts and helps provide a cross-discipline overview of the security and practical issues for embedded systems, tokens, and platforms. It is an ideal complement to the earlier work, *Smart Cards Tokens, Security and Applications* from the same editors.

Them and Us Philippe Legrain 2020-10-15 Winner of the Diversity, Inclusion and Equality Award at the Business Book Awards 2021 'Underpinned by scholarship...entertaining...Legrain's book fizzles with practical ideas.' The Economist 'The beauty of diversity is that innovation often comes about by serendipity. As Scott Page observed, one day in 1904, at the World Fair in St Louis, the ice cream vendor ran out of cups. Ernest Hami, a Syrian waffle vendor in the booth next door, rolled up some waffles to make cones – and the rest is history.' Filled with data, anecdotes and optimism, *Them and Us* is an endorsement of cultural differences at a time of acute national introspection. By every measure, from productivity to new perspectives, immigrants bring something beneficial to society. If patriotism means wanting the best for your country, we should be welcoming immigrants with open arms.

Refuge beyond Reach David Scott FitzGerald 2019-03-14 Media pundits, politicians, and the public are often skeptical or ambivalent about granting asylum. They fear that asylum-seekers will impose economic and cultural costs and pose security threats to nationals. Consequently, governments of rich, democratic countries attempt to limit who can approach their borders, which often leads to refugees breaking immigration laws. In *Refuge beyond Reach*, David Scott FitzGerald traces how rich democracies have deliberately and systematically shut down most legal paths to safety. Drawing on official government documents, information obtained via WikiLeaks, and interviews with asylum seekers, he finds that for ninety-nine percent of refugees, the only way to find safety in one of the prosperous democracies of the Global North is to reach its territory and then ask for asylum. FitzGerald shows how the US, Canada, Europe, and Australia comply with the letter of law while violating the spirit of those laws through a range of deterrence methods-first designed to keep out Jews fleeing the Nazis-that have now evolved into a pervasive global system of "remote control." While some of the most draconian remote control practices continue in secret, FitzGerald identifies some pressure points and finds that a diffuse humanitarian obligation to help those in need is more difficult for governments to evade than the law alone. *Refuge beyond Reach* addresses one of the world's most pressing challenges-how to manage flows of refugees and other types of migrants-and helps to identify the conditions under which individuals can access the protection of their universal rights.

The Lived Experiences of African International Students in the UK James Marson 2022-01-11 International student migration makes a significant contribution to higher education in the United Kingdom, with Southern Africa, and Nigeria in particular, positioned joint sixth in the top ten of sending countries. Many of these student-migrants, in supplementing their finances to fund their studies in the United Kingdom, undertake employment. Temporary and/or part-time employment is integral to the student-migrant experience, despite the express purpose of their admission into the United Kingdom designated for study purposes and not work. This explicit object is reflected in restrictions affixed to international students' employment rights whilst studying; they are generally restricted to a maximum of 20 hours of work per week during term time and proscribed from working full time or as independent contractors. Given the scant regard this topic has received in the existing literature, this study offers an examination of students' lived employment experiences under these rules. The study aims to offer a contribution, first in respect of the employment experiences of student-migrants through the analytical framework of 'precarity' by examining the various manifestations of insecurity in the students' lived realities, nuanced by structures of migration control and labour market temporalities. Secondly, by adopting the socio-legal schema of legal consciousness, the study considers the student-migrants' relationship with the law by way of the legal restrictions on their employment and examines their agency as evidenced through efforts to derogate from these rules.

Housing Booms in Gateway Cities David Ley 2023-06-29 HOUSING BOOMS IN GATEWAY CITIES "David Ley examines the development of housing booms, and policies intended to stimulate or limit them. Utilising a comparative approach in five gateway cities, he provides a superb understanding of the politics of booms, lifting the debate beyond narrow housing and real estate studies. This book is required reading for anyone interested in global cities, housing markets, or comparative urbanism." –Manuel B. Aalbers, Professor of Human Geography, KU Leuven, Belgium "A stellar contribution to housing and its financialisation as central to the capitalist project globally, *Housing Booms* offers a wonderful window into the ascendancy of the secondary circuit of real estate in Singapore, Hong Kong, Sydney, Vancouver, and London. Critically, through careful, empirically rigorous comparison, an eminent urban social scientist urges us to understand the importance of placing urban housing theoretically." –Loretta Lees, Director of the Initiative on Cities, Boston University "Mastering a wealth of information and insights from five gateway cities, David Ley provides fresh and inspiring explanation of both common global logics and diverse local trajectories of housing booms in the era of financialisation and asset-based accumulation. A timely and ground-breaking contribution, (re)positioning housing to the centrality pervasively felt in everyday life but largely unacknowledged in mainstream social science." –George Lin, Chair Professor of Geography, University of Hong Kong In *Housing Booms in Gateway Cities*, renowned geographer Dr. David Ley delivers a detailed exploration of housing markets in Hong Kong, Singapore, Sydney, Vancouver, and London and explains why these gateway cities have seen dramatic increases in residential real estate prices since the 1980s. The author describes how the globalization of real estate has rapidly inflated demand and uncoupled local housing prices from local wages, causing acute problems of affordability, availability, and inequality. The book implicates government policy in massive real estate price inflation, describing a shift from welfare-based to asset-based societies. It also highlights the relatively unique experience in Singapore, where asset-based housing policy has encouraged the dispersion of ownership and accumulation through an increased supply of subsidized leasehold apartments and the regulation of disruptive investment flows. *Housing Booms in Gateway Cities* is an ideal resource for academics, students and policymakers with an interest in urban geography, sociology, and planning, housing studies, and any of the cities discussed in the book. It is an innovative treatment of housing as a central category in wealth accumulation in urban economies and societies.
