Mencius Mengzi 2009 Known throughout East Asia as Mengzi, or "Master Meng," Mencius (391-308 B.C.E.) was a Chinese philosopher of the late Zhou dynasty, an instrumental figure in the spread of the Confucian tradition, and a brilliant illuminator of its ideas. Mencius was active during the Warring States Period (403-221 B.C.E.), in which competing powers sought to control the declining Zhou empire. Like Confucius, Mencius journeyed to one feudal court after another, searching for a proper lord who could put his teachings into practice. Only a leader who possessed the moral qualities of a true king could unify China, Mencius believed, and in his defense of Zhou rule and Confucian philosophy, he developed an innovative and highly nuanced approach to understanding politics, self-cultivation, and human nature, profoundly influencing the course of Confucian thought and East Asian culture. Mencius is a record of the philosopher's conversations with warring lords, disciples, and adversaries of the Way, as well as a collection of pronouncements on government, human nature, and a variety of other philosophical and political subjects. Mencius is largely concerned with the motivations of human actors and their capacity for mutual respect. He builds on the Confucian idea of ren, or humaneness, and places it alongside the complementary principle of yi, or rightness, advancing a complex notion of what is right for certain individuals as they perform distinct roles in specific situations. Consequently, Mencius's impact was felt not only in the thought of the intellectual and social elite but also in the value and belief systems of all Chinese people.

Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 edition. Excerpt: ... 8 ART OF WORLDLY WISDOM men. Sagacity fights with strategic changes of intention: it never does what it threatens, it aims only at escaping notice. It aims in the air with dexterity and strikes home in an unexpected direction, always seeking to conceal its game. It lets a purpose appear in order to attract the opponent's attention, but

then turns round and conquers by the unexpected. But a penetrating intelligence anticipates this by watchfulness and lurks in ambush. It always understands the opposite of what the opponent wishes it to understand, and recognises every feint of guile. It lets the first impulse pass by and waits for the second, or even the third. Sagacity now rises to higher flights on seeing its artifice foreseen, and tries to deceive by truth itself, changes its game in order to change its deceit, and cheats by not cheating, and finds deception on the greatest candour. But the opposing intelligence is on guard with increased watchfulness, and discovers the darkness concealed by the light and deciphers every move, the more subtle because more simple. In this way the guile of the Python combats the far darting rays of Apollo. xiv The Thing Itself and the Way it is done. "Substance" is not enough: "accident" is also required, as the scholastics say. A bad manner spoils everything, even reason and justice; a good one supplies everything, gilds a No, sweetens truth, and adds a touch of beauty to old age itself. The how plays a large part in affairs, a good manner steals into the affections. Fine behaviour is a joy in life, and a pleasant expression helps out of a difficulty in a remarkable way. xv Keep Ministering Spirits. It is a privilege of the mighty to surround themselves with the champions of intellect; these extricate...
