Orphan Island Laurel Snyder 2017-05-30 A National Book Award Longlist title! "A wondrous book, wise and wild and deeply true." —Kelly Barnhill, Newbery Medal-winning author of *The Girl Who Drank the Moon* "This is one of those books that haunts you long after you read it. Thought-provoking and magical." —Rick Riordan, author of the Percy Jackson series In the tradition of modern-day classics like Sara Pennypacker's *Pax* and Lois Lowry's *The Giver* comes a deep, compelling,

heartbreaking, and completely one-of-a-kind novel about nine children who live on a mysterious island. On the island, everything is perfect. The sun rises in a sky filled with dancing shapes; the wind, water, and trees shelter and protect those who live there; when the nine children go to sleep in their cabins, it is with full stomachs and joy in their hearts. And only one thing ever changes: on that day, each year, when a boat appears from the mist upon the ocean carrying one young child to join them—and taking the eldest one away, never to be seen again. Today's *Changing* is no different. The boat arrives, taking away Jinny's best friend, Deen, replacing him with a new little girl named Ess, and leaving Jinny as the new Elder. Jinny knows her responsibility now—to teach Ess everything she needs to know about the island, to keep things as they've always been. But will she be ready for the

Encouraging Openness Nimrod Bar-Am
2017-06-22 This volume features forty-two essays written in honor of Joseph Agassi. It explores the work and legacy of this influential philosopher, an exciting and

challenging advocate of critical rationalism. Throughout six decades of stupendous intellectual activity, Agassi called attention to rationality as the very starting point of every notable philosophical way of life. The essays present Agassi's own views on critical rationalism. They also develop and expand upon his work in new and provocative ways. The authors include Agassi's most notable pupils, friends, and colleagues. Overall, their contributions challenge the received view on a variety of issues concerning science, religion, and education. Readers will find well-reasoned arguments on such topics as the secular problem of evil, religion and critical thinking, liberal democratic educational communities, democracy and constitutionalism, and capitalism at a crossroad."/div>divTo Joseph Agassi, philosophy is the practice of reason, where reason is understood as the relentless

search for criticisms of the best available explanations that we have to the world around us. This book not only honors one of the most original philosophers of science today. It also offers readers insights into a school of thought that lies at the heart of philosophy.

Poison Study Maria V. Snyder 2020-07-13

Choose: a quick death... or slow poison...

Locked deep in the palace dungeon for killing her abuser, Yelena knows she'll never be free again. The laws in Ixia are strict, and murderers must be executed, no matter the reason. But just as she's resigned herself to her fate, she's offered an extraordinary reprieve. As the food taster, Yelena will eat the best meals, have rooms in the palace — and risk

assassination by anyone trying to kill the Commander of Ixia. To make matters worse, the chief of security deliberately feeds her Butterfly's Dust, and only by appearing for her daily antidote will she delay an agonizing death from the poison. As Yelena tries to escape her new dilemma, disasters keep mounting. Rebels plot to seize Ixia and Yelena develops magical powers she can't control. Her life is threatened again, and in order to survive, she must unravel the secrets behind the past she's been running from. Previously published. The Philosophical Breakfast Club Laura J. Snyder 2012-01-17 "[A] fascinating

book...about the way four geniuses at Cambridge University revolutionized modern science.” —Newsweek The Philosophical Breakfast Club recounts the life and work of four men who met as students at Cambridge University: Charles Babbage, John Herschel, William Whewell, and Richard Jones. Recognizing that they shared a love of science (as well as good food and drink) they began to meet on Sunday mornings to talk about the state of science in Britain and the world at large. Inspired by the great 17th century scientific reformer and political figure Francis Bacon—another former student of Cambridge—the Philosophical Breakfast Club plotted to bring about a new scientific revolution. And to a remarkable extent, they succeeded, even in ways they never intended. Historian of science and philosopher Laura J. Snyder exposes the political passions, religious impulses,

friendships, rivalries, and love of knowledge—and power—that drove these extraordinary men. Whewell (who not only invented the word “scientist,” but also founded the fields of crystallography, mathematical economics, and the science of tides), Babbage (a mathematical genius who invented the modern computer), Herschel (who mapped the skies of the Southern Hemisphere and contributed to the invention of photography), and Jones (a curate who shaped the science of economics) were at the vanguard of the modernization of science. This absorbing narrative of people, science and ideas chronicles the intellectual revolution inaugurated by these men, one that continues to mold our understanding of the world around us and of our place within it. Drawing upon the voluminous correspondence between the four men over the fifty years of their work, Laura J. Snyder

shows how friendship worked to spur the men on to greater accomplishments, and how it enabled them to transform science and help create the modern world. "The lives and works of these men come across as fit for Masterpiece Theatre." —Wall Street Journal "Snyder succeeds famously in evoking the excitement, variety and wide-open sense of possibility of the scientific life in 19th-century Britain...splendidly evoked in this engaging book." —American Scientist "This fine book is as wide-ranging and anecdotal, as excited and exciting, as those long-ago Sunday morning conversations at Cambridge. The Philosophical Breakfast Club forms a natural successor to Jenny Uglow's The Lunar Men...and Richard Holmes's The Age of Wonder." —Washington Post

individual liberty, arguing from the philosophy of Ayn Rand and citing the findings of evolutionary psychology to demonstrate the compatibility between human nature and laissez-faire liberty. The first installment, The Freedom of Peaceful Action, makes the philosophic case that an approach starting from observational reason will indicate the practicality and ethical desirability of a free-market system based on rights.

El ojo del observador : Johannes Vermeer, Antoni van Leeuwenhoek y la

reinención de la mirada Laura J. Snyder 2017-10 En el verano de 1674, en la ciudad de Delft, Antoni van Leeuwenhoek descubrió, mirando a través de una minúscula lente, el mundo microscópico. Al mismo tiempo, en la buhardilla de una casa cercana, Johannes Vermeer empleaba otro instrumento óptico -una cámara oscura- para experimentar con la luz y crear así las pinturas más luminosas que el mundo ha contemplado. A partir de entonces, los avances de la física, la astronomía, la química y la anatomía abrieron paso a la ciencia moderna, transformando nuestra visión del mundo y la manera de reflejarlo. Una extraordinaria revolución que Laura J. Snyder narra con exquisita sensibilidad: la búsqueda del conocimiento a través de la mirada y la vida de dos hombres que, probablemente, nunca llegaron a conocerse.

Life in the Market Ecosystem Stuart K.

By Laura J Snyder Pdf upload Herison f Boyle

Hayashi 2014-11-13 *Life in the Market Ecosystem*, the second book in the *Nature of Liberty* trilogy, confronts evolutionary psychology head on. It describes the evolutionary psychologists' theory of gene-culture co-evolution, which states that although customs and culture are not predetermined by anyone's genetic makeup, one's practice of a custom can influence the likelihood of that person having children and grandchildren. Therefore, according to the theory, customs count as evolutionary adaptations. Extending that theory further, as entire systems of political economy—capitalism, socialism, and hunter-gatherer subsistence—consist of multiple customs and institutions, it follows that an entire political-economic system can likewise be classified as an evolutionary adaptation. Considering that liberal-republican capitalism has, insofar as the system has

been implemented, done more to reduce the mortality rate and secure human fertility than other models of societal structure, it stands to reason that liberal-republican capitalism is itself a beneficent evolutionary adaptation. Moreover, as essential tenets of Rand's Objectivism—individualism, observation-based rationality, and peaceable self-interest—have been integral to the development of the capitalist ecosystem, important aspects of the Objectivism are worthwhile adaptations as well. This book shall uphold that position, as well as combat critiques by evolutionary psychologists and environmentalists who denounce capitalism as self-destructive. Instead, capitalism is the most sustainable and fairest political model. This book argues that of all the philosophies, Objectivism is the one that is most fit for humanity.

Evidence-Based Programming for Older Adults Marcia G. Ory 2015-06-17 There is increased world-wide concern about the impact of multiple chronic conditions, especially among the rapidly aging population. Simultaneously, over the past decade there has been an emergence of state-wide and national initiatives to reduce the burden of chronic conditions that draw upon the translation of evidence-based programs (EPB) into community practice. Yet, little has been written about the national and international implementation, dissemination, and sustainability of such programs. This Research Topic features articles about EBPs for older adults, including a range of articles that focus on the infrastructure needed to widely disseminate EBP as well as individual participant impacts on physical, mental, and social aspects of health and well-being. Using a pragmatic research perspective,

this Research Topic will advance knowledge that aims to enhance practice, inform policy and build systems of support and delivery in regard to the reach, effectiveness, adoption, implementation, and maintenance of evidence-based interventions for older adults. The focus is on knowledge transfer rather than knowledge generation but with a dual emphasis on the dissemination and sustainability of EBP that have been tested and shown effective as well as the adaptation of practice-based interventions into evidence-based programs. This Research Topic draws upon grand-scale efforts to deliver these programs, and include both U.S. as well as international examples. Commentaries discuss processes in the development and measurement of EBP and reflect perspectives from program developers and major national and regional funders of EBP as well as professionals and practitioners in the field. The full-length

articles focus on four major programmatic areas: (1) chronic disease self-management programs; (2) fall prevention programs; (3) general wellness and physical activity programs; and (4) mental health programs. Additionally, articles are included to discuss cross-cutting issues related to building partnerships and the research infrastructure for the implementation, evaluation, and dissemination of evidence-based programming. The intent of this Research Topic is to enhance practice, inform policy, and build systems of support and delivery for EBP. It is written for a diverse audience and contains practical implications and recommendations for introducing, delivering, and sustaining EBP in a multitude of settings.

Teaching to Change the World Jeannie Oakes 2018-01-29 Teaching to Change the World is an up-to-the-moment, engaging, social justice-oriented introduction to

education and teaching, and the challenges and opportunities they present. Both foundational and practical, the chapters are organized around conventional topics but in a way that consistently integrates a coherent story that explains why schools are as they are. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers' role in addressing them. This thoroughly revised fifth edition remains a vital introduction to the profession for a new generation of teachers who seek to become purposeful, knowledgeable practitioners in our ever-changing educational landscape—for those teachers who see the potential for education to change the world. Features and Updates of the New Edition: • Fully

updated Chapter 1, "The U.S. Schooling Dilemma," reflects our current state of education after the 2016 U.S. presidential election. • First-person observations from teachers, including first-year teachers, continue to offer vivid, authentic pictures of what teaching to change the world means and involves. • Additional coverage of the ongoing effects of Common Core highlights the heated public discourse around teaching and teachers, and charter schools. • Attention to diversity and inclusion is treated as integral to all chapters, woven throughout rather than tacked on as separate units. • "Digging Deeper" resources on the new companion website include concrete resources that current and future teachers can use in their classrooms. • "Tools for Critique" provides instructors and students questions, prompts, and activities aimed at encouraging classroom discussion and particularly engaging those

students least familiar with the central tenets of social justice education. Successfully Serving the College Bound Africa S. Hands 2014-12-12 With the assistance of this book, public libraries can provide truly outstanding service to this important population.

Unbroken (Movie Tie-in Edition) Laura Hillenbrand 2018-08-21 #1 NEW YORK TIMES BESTSELLER • The incredible true story of survival and salvation that is the basis for two major motion pictures: 2014's *Unbroken* and the upcoming *Unbroken: Path to Redemption*. On a May afternoon in 1943, an Army Air Forces bomber crashed into the Pacific Ocean and disappeared, leaving only a spray of debris and a slick of oil, gasoline, and blood. Then, on the ocean surface, a face appeared. It was that of a young lieutenant, the plane's bombardier, who was struggling to a life raft and pulling himself aboard. So began one of the most

extraordinary odysseys of the Second World War. The lieutenant's name was Louis Zamperini. In boyhood, he'd been a cunning and incorrigible delinquent, breaking into houses, brawling, and fleeing his home to ride the rails. As a teenager, he had channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics and within sight of the four-minute mile. But when war had come, the athlete had become an airman, embarking on a journey that led to his doomed flight, a tiny raft, and a drift into the unknown. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, a foundering raft, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether

triumph or tragedy, would be suspended on the fraying wire of his will. In her long-awaited new book, Laura Hillenbrand writes with the same rich and vivid narrative voice she displayed in *Seabiscuit*. Telling an unforgettable story of a man's journey into extremity, *Unbroken* is a testament to the resilience of the human mind, body, and spirit. Praise for *Unbroken* "Extraordinarily moving . . . a powerfully drawn survival epic."—The Wall Street Journal "[A] one-in-a-billion story . . . designed to wrench from self-respecting critics all the blurby adjectives we normally try to avoid: It is amazing, unforgettable, gripping, harrowing, chilling, and inspiring."—New York "Staggering . . . mesmerizing . . . Hillenbrand's writing is so ferociously cinematic, the events she describes so incredible, you don't dare take your eyes off the page."—People "A meticulous, soaring and beautifully written

account of an extraordinary life."—The Washington Post "Ambitious and powerful . . . a startling narrative and an inspirational book."—The New York Times Book Review "Marvelous . . . *Unbroken* is wonderful twice over, for the tale it tells and for the way it's told. . . . It manages maximum velocity with no loss of subtlety."—Newsweek "Moving and, yes, inspirational . . . [Laura] Hillenbrand's unforgettable book . . . deserve[s] pride of place alongside the best works of literature that chart the complications and the hard-won triumphs of so-called ordinary Americans and their extraordinary time."—Maureen Corrigan, *Fresh Air* "Hillenbrand . . . tells [this] story with cool elegance but at a thrilling sprinter's pace."—Time "Unbroken is too much book to hope for: a hellride of a story in the grip of the one writer who can handle it."—Christopher McDougall, author of *Born*

The Brain in Search of Itself Benjamin Ehrlich 2022-03-15 "Passionate and meticulous . . . [Ehrlich] delivers thought-provoking metaphors, unforgettable scenes and many beautifully worded phrases."
—Benjamin Labatut, The New York Times Book Review One of The Telegraph's best books of the year The first major biography of the Nobel Prize-winning scientist who discovered neurons and transformed our understanding of the human

mind—illustrated with his extraordinary anatomical drawings Unless you're a neuroscientist, Santiago Ramón y Cajal is likely the most important figure in the history of biology you've never heard of. Along with Charles Darwin and Louis Pasteur, he ranks among the most brilliant and original biologists of the nineteenth century, and his discoveries have done for our understanding of the human brain what the work of Galileo and Sir Isaac Newton did for our conception of the physical universe. He was awarded the Nobel Prize in 1906 for his lifelong investigation of the structure of neurons: "The mysterious butterflies of the soul," Cajal called them, "whose beating of wings may one day reveal to us the secrets of the mind." And he produced a dazzling oeuvre of anatomical drawings, whose alien beauty grace the pages of medical textbooks and the walls of museums to this day. Benjamin

Ehrlich's *The Brain in Search of Itself* is the first major biography in English of this singular figure, whose scientific odyssey mirrored the rocky journey of his beloved homeland of Spain into the twentieth century. Born into relative poverty in a mountaintop hamlet, Cajal was an enterprising and unruly child whose ambitions were both nurtured and thwarted by his father, a country doctor with a flinty disposition. A portrait of a nation as well a biography, *The Brain in Search of Itself* follows Cajal from the hinterlands to Barcelona and Madrid, where he became an illustrious figure—resisting and ultimately transforming the rigid hierarchies and underdeveloped science that surrounded him. To momentous effect, Cajal devised a theory that was as controversial in his own time as it is universal in ours: that the nervous system is comprised of individual cells with distinctive roles, just like any

other organ in the body. In one of the greatest scientific rivalries in history, he argued his case against Camillo Golgi and prevailed. In our age of neuro-imaging and investigations into the neural basis of the mind, Cajal is the artistic and scientific forefather we must get to know. *The Brain in Search of Itself* is at once the story of how the brain as we know it came into being and a finely wrought portrait of an individual as fantastical and complex as the subject to which he devoted his life.

The Spell of the Sensuous David Abram
2012-10-17 Winner of the International Lannan Literary Award for Nonfiction
Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of

habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patterns) that we have only lately come to think of as "inanimate." How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to recover a sustaining relation with the breathing earth? In *The Spell of the Sensuous* David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the

sensual foundations of language, which—even at its most abstract—echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.

The Global Water Crisis David E. Newton
2016-04-25 How is water scarcity becoming a serious problem worldwide—including in the United States? This book provides a broad overview of water, sanitation, and hygiene problems faced by both developing and developed nations around the globe and suggests how these problems can be solved by imaginative and innovative thinking. Human society depends on sufficient clean water. In many parts of the world, however, this most basic commodity is in very short supply. Even in developed, first-world nations, climate change and

other factors have begun to create alarming water supply issues. The *Global Water Crisis: A Reference Handbook* provides a detailed overview of this important topic, enabling readers to understand the nature of the world's water, sanitation, and hygiene (WASH) problems and to know what resources are best for conducting their own research on the topic. The first chapter of the book provides the historical background information pertaining to the world's water and sanitation problems; the second chapter documents the problems, explores the issues, and presents potential solutions for understanding the nature of WASH issues. The other sections provide the needed resources for readers to study the issue of the global water crisis further: perspective essays, primary documents, biographical profiles, data and documents, an extended annotated bibliography, a chronology, and a glossary.

The remarkable story of how an artist and a scientist in seventeenth-century Holland transformed the way we see the world. On a summer day in 1674, in the small Dutch city of Delft, Antoni van Leeuwenhoek—a cloth salesman, local bureaucrat, and self-taught natural philosopher—gazed through a tiny lens set into a brass holder and discovered a never-before imagined world of microscopic life. At the same time, in a nearby attic, the painter Johannes Vermeer was using

another optical device, a camera obscura, to experiment with light and create the most luminous pictures ever beheld. “See for yourself!” was the clarion call of the 1600s. Scientists peered at nature through microscopes and telescopes, making the discoveries in astronomy, physics, chemistry, and anatomy that ignited the Scientific Revolution. Artists investigated nature with lenses, mirrors, and camera obscuras, creating extraordinarily detailed paintings of flowers and insects, and scenes filled with realistic effects of light, shadow, and color. By extending the reach of sight the new optical instruments prompted the realization that there is more than meets the eye. But they also raised questions about how we see and what it means to see. In answering these questions, scientists and artists in Delft changed how we perceive the world. In *Eye of the Beholder*, Laura J. Snyder transports us to the streets, inns,

and guildhalls of seventeenth-century Holland, where artists and scientists gathered, and to their studios and laboratories, where they mixed paints and prepared canvases, ground and polished lenses, examined and dissected insects and other animals, and invented the modern notion of seeing. With charm and narrative flair Snyder brings Vermeer and Van Leeuwenhoek—and the men and women around them—vividly to life. The story of these two geniuses and the transformation they engendered shows us why we see the world—and our place within it—as we do today.

Improving Student Learning One

Teacher at a Time Jane E. Pollock 2020-12-16 In this second edition of *Improving Student Learning One Teacher at a Time*, Jane E. Pollock and Laura J. Tolone combine updated research and real-world stories to demonstrate how it takes only one teacher to make a difference in student performance. Their approach expands the classic three-part curriculum-instruction-assessment framework by

adding one key ingredient: feedback. This "Big Four" approach offers an easy-to-follow process that helps teachers build better curriculum documents with *

- * Curriculum standards that are clear and well-paced, and describe what students will learn.
- * Instruction based in research, from daily lessons to whole units of study.
- * Assessment that maximizes feedback and requires critical and creative thinking.
- * Feedback that tracks and reports individual student progress by standards.

Pollock and Tolone demonstrate how consistent, timely feedback from multiple sources can help students monitor their own understanding and help teachers align assignments, quizzes, and tests more explicitly to the standards. The Big Four shifts the focus away from the basics of what makes a good teacher toward what makes good learning happen for every student every day.

The Project of Positivism in International Law Mónica García-Salmones Rovira 2013-11-28 International legal positivism has been crucial to the development of international law since the nineteenth century. It is often seen as the basis of mainstream or traditional international legal thought. The Project of Positivism in International Law addresses this theory in the long-standing tradition of critical intellectual histories of international law. It

provides a nuanced analysis of the resilience of the economic-positivist theory, and shows how influential its role was in shaping the modern frameworks of international law. The book argues that the rise of positivist international law was inseparable from philosophical developments placing the notion of conflict of interests at the centre of collective life. Where previously international thought was dominated by notions of the right, the just, and the good, increasingly international relations became viewed as 'interests' in need of harmonisation. In this context, international law was re-founded as the universal law that could harmonise the interests of both public and private international entities. The book argues that these evolutions in philosophical thought were bound up with the consolidation of capitalism, and with the ideas about human existence and human nature which

emerged in that process. It provides an innovative analysis of the selected biography of ideas which it presents, including a detailed focus on the work of Hans Kelsen, one of the leading positivist thinkers of the twentieth century. It also argues that the work of Lassa Oppenheim should be included within this analysis, as providing some of the key founding texts of positivism in international law. This book will be a fascinating read for scholars and students of international legal theory, historians of ideas, and legal philosophers. *History and Power in the Study of Law* June Starr 2018-03-15 Building on earlier work in the anthropology of law and taking a critical stance toward it, June Starr and Jane F. Collier ask, "Should social anthropologists continue to isolate the 'legal' as a separate field of study?" To answer this question, they confront critics of legal anthropology who suggest that the

subfield is dying and advocate a reintegration of legal anthropology into a renewed general anthropology. Chapters by anthropologists, sociologists, and law professors, using anthropological rather than legal methodologies, provide original analyses of particular legal developments. Some contributors adopt an interpretative approach, focusing on law as a system of meaning; others adopt a materialistic approach, analyzing the economic and political forces that historically shaped relations between social groups.

Blanche Ames Ames (1878-1969) and

Oakes Ames (1874-1950) Elizabeth F.

Fideler 2023-05-04 Blanche Ames Ames and Oakes Ames advanced women's suffrage,

reproductive rights, artistic expression, and scientific knowledge, among other accomplishments, in the first half of the twentieth century. Blanche was part of women's history for nearly seven decades and deserved to be better known for that and other reasons. Oakes's contributions to the women's suffrage movement and his extraordinary scientific accomplishments might have received greater recognition had he not avoided the spotlight so successfully. Their story is one of mutual enabling. Believing in gender equality, even if outside the bounds of what was considered socially acceptable, they named their home "Borderland" to represent boundary pushing. One lasting influence is found in the social justice arena. The Harvard professor of botany and supervisor of the university's major botanical institutions and his sociable, highly independent wife were both active in the

fight to secure the vote for women, with Blanche contributing original political cartoons to newspapers. Blanche led the Birth Control League of Massachusetts for nearly twenty years, then used her position and skills on behalf of the New England Hospital for Women and Children. Unity Church and Memorial Hall in Easton, Massachusetts, were family gifts, as was their home, now Borderland State Park.

Reforming Philosophy Laura J. Snyder 2010-11-15 The Victorian period in Britain was an “age of reform.” It is therefore not surprising that two of the era’s most eminent intellects described themselves as reformers. Both William Whewell and John Stuart Mill believed that by reforming philosophy—including the philosophy of science—they could effect social and political change. But their divergent visions of this societal transformation led to a sustained and spirited controversy that

covered morality, politics, science, and economics. Situating their debate within the larger context of Victorian society and its concerns, *Reforming Philosophy* shows how two very different men captured the intellectual spirit of the day and engaged the attention of other scientists and philosophers, including the young Charles Darwin. Mill—philosopher, political economist, and Parliamentarian—remains a canonical author of Anglo-American philosophy, while Whewell—Anglican cleric, scientist, and educator—is now often overlooked, though in his day he was renowned as an authority on science. Placing their teachings in their proper intellectual, cultural, and argumentative spheres, Laura Snyder revises the standard views of these two important Victorian figures, showing that both men’s concerns remain relevant today. A philosophically and historically sensitive account of the

engagement of the major protagonists of Victorian British philosophy, *Reforming Philosophy* is the first book-length examination of the dispute between Mill and Whewell in its entirety. A rich and nuanced understanding of the intellectual spirit of Victorian Britain, it will be welcomed by philosophers and historians of science, scholars of Victorian studies, and students of the history of philosophy and political economy.

Block Granting Medicaid Edward Alan Miller 2013-11-12 Medicaid is the largest grant-in-aid program in the United States. Reform in this area, therefore, provides a unique opportunity to study the intersection between federal and state policy making in an area recently characterized by substantial uncertainty deriving from the lingering effects of the Great Recession, ongoing debate over the federal budget,

and implementation of the Patient Protection and Affordable Care Act. Invariably states reform the way health care is delivered, regulated, and financed within broader parameters established by federal statutes and regulations. It is critical therefore that effective strategies be put into place if both current and future health and long-term care reform efforts are to have their greatest chances at success. Rhode Island is the first state to receive permission to operate its entire Medicaid program under a global cap. As a consequence, it has entered the national consciousness as a key data point potentially supporting the block grant approach to Medicaid reform. In this book, Edward Alan Miller identifies factors that either facilitated or impeded the design and implementation of Rhode Island's Global Consumer Choice Compact Medicaid

Waiver in order to draw broader lessons for the Medicaid block grant debate and health and long-term care reform more generally. Evidence gathered from archival sources and in-depth interviews with key stakeholders exposes the role that provider capacity has played in the implementation process, including adult day care, assisted living, home maker, and other home- and community-based services. The impact of the Global Waiver on the nursing home sector is examined as well, in addition to new authority to obtain federal matching dollars for previously state-only funded programs. By providing a sophisticated understanding of factors enhancing or impeding state health reform, this book will contribute to improvements in the development and administration of policy development at both the state- and federal-levels.
